

The Mobiloil Carnet enables you to obtain supplies of Aero-Mobiloil and fuel when flying abroad, without carrying large cash sums of different foreign currencies. Representatives of the Vacuum Oil Company at landing-grounds along your route will give you every assistance in their power.

THE VACUUM OIL COMPANY LIMITED, LONDON, S.W.1

● For safety at night—beacons and floodlights. For safety in flight—Aero-Mobiloil. Aero-Mobiloil gives you an *extra* margin of safety, because the non-lubricating elements which exist in all crude oils have been finally dissolved and “washed away” by the exclusive Clearosol process. To reduce wear, to conserve power, to lengthen the safe time between top and complete overhauls, keep your engine properly lubricated with Aero-Mobiloil. It forms less carbon, prevents choked oil-ways, doesn't gum. Aero-Mobiloil is obtainable throughout the world and is everywhere uniform in quality. Approved by all the principal British and Foreign aero-engine manufacturers.
